FRAOL MASRESHA

FULL STACK WEBSITE DEVELOPER

PROFILE

Full Stack Web Developer with a strong academic background (**3.8 CGPA**) and hands-on experience building real-world web applications using **React and modern backend technologies**. I have worked on production-level projects for media, government-related events, startups, and individual clients, delivering practical solutions such as ticketing systems, QR code validation, and responsive platforms. I'm comfortable taking a project from idea to deployment, value clean and maintainable code, and enjoy solving real problems with simple, reliable technology.

EDUCATION

Addis Ababa University

October 2024 – Expected to graduate in 2028

I hold a **3.8 CGPA** and have solid hands-on experience in **full-stack web development using React**. My coursework built a strong foundation in core computer science concepts, while my practical projects focused on designing, developing, and deploying responsive, real-world web applications.

WORK EXPERIENCE

Yobo Production — *Full-Stack Web Developer*
Project-based

- Designed and developed a responsive website for a movie production team to showcase films, cast, and production updates.
- Built reusable UI components and optimized performance for media-heavy pages.
- Worked closely with creatives to translate visual concepts into functional web features.

Tourism Ethiopia (Symposium Project) — *Web Developer*
Contract / Local Project

- Developed a **ticketing system with QR code generation** for a locally hosted symposium.
- Implemented attendee validation and QR scanning workflow to streamline event check-in.
- Improved registration efficiency and reduced manual verification during the event.

SKILLS

Skill	Level
UI/UX design	65%
React.js	95%
Database Design	75%
API Design	100%
